## Balanced to breed on...on...on...

We strive to deliver stud and flock rams that will perform in varied climates and environments also keeping in touch with market trends.

After years of closed breeding to develop the Darriwell type, a true All-round package, the sheep we breed are becoming more stamped with productivity and profitability.

These factors are most important for sustained breed on ability in a commodity market that means producing a greater volume of quality wool with increased meat returns from large frames and a fertile outlook. This true All-round package allows you to always be at the top end of financial returns, wherever the market trends.

JEROME CARBERRY, DARRIWELL BLOOD POLL EWES  
WINNERS OF THE BATHURST MAIDEN EWE COMPETITION 2019

## Darriwell Poll Stud

The Poll Stud will be bred along similar direction to the horn stud with the same balance to breed on adopted. We now have over 1200 poll stud ewes.

A big effort has been placed on nourishment in the 'Pollies', to compliment the faster growth rate associated with the poll type also a need to ensure follicle density remains at a high level while breeding these fast tracked, modern merinos.

Darriwell has selected sires with the attributes to advance the poll stud to breed our desired type.

Having utilized strong Poll Boonoke Families and Wools from Wallaloo Park to enhance the allround presence of the Darriwell Poll Stud sheep.

Sire 1198 "RADAR" X PB130028 is breeding very rich, heavy lock progeny, such as this year's lead ram, E/T 1382.

AN INCREASE IN  
POLL NUMBERS  
WILL SEE A GREATER  
SELECTION OF  
QUALITY, PRODUCTIVE  
POLL RAMS  
AVAILABLE FOR  
SALE THIS YEAR.
